

Enable IT™
Operate. Optimize.

The **next generation** LIMS
for **next generation** labs.

Ensō-LIMS The Emerging Market Leader in LIMS

Ensō-LIMS has been developed to cater to the demand for digital transformation in the testing laboratory market. It has quickly gained acceptance in the Indian and overseas laboratory market. Ensō-LIMS is being successfully implemented in both private, commercial and industrial laboratories as well as government research institutes.

Ensō-LIMS is a comprehensive platform that covers the complete process of sample tracking and management from test requisition to reporting. It is an enterprise-integrated LIMS that manages all aspects of front office, resource optimization, task scheduling, and process compliance in a laboratory. Its advanced features and optional add-ons along with consulting services ensure complete workflow management and high return on investment (RoI), making it a far more comprehensive and robust LIMS. Operating Ensō-LIMS in your laboratories helps optimize your organizational productivity and efficiency by centralizing data, organizing your workflows, tracking in real-time and reducing management overheads.

Key Functions

Ensō-LIMS addresses a set of key core and general management functions for laboratories. These functions are provided as part of standard off-the-shelf version of Ensō-LIMS:

Sample Processing

Test Process

Database Querying
and Analytics

Audit Compliance
and Reporting

Management
Information Systems

Documentation,
Training and Support

Flexible Add-Ons

Ensō-LIMS comes with add-ons that help manage other functions and save investment in additional systems. We also provide consulting services, where required. The following are some of the key add-ons:

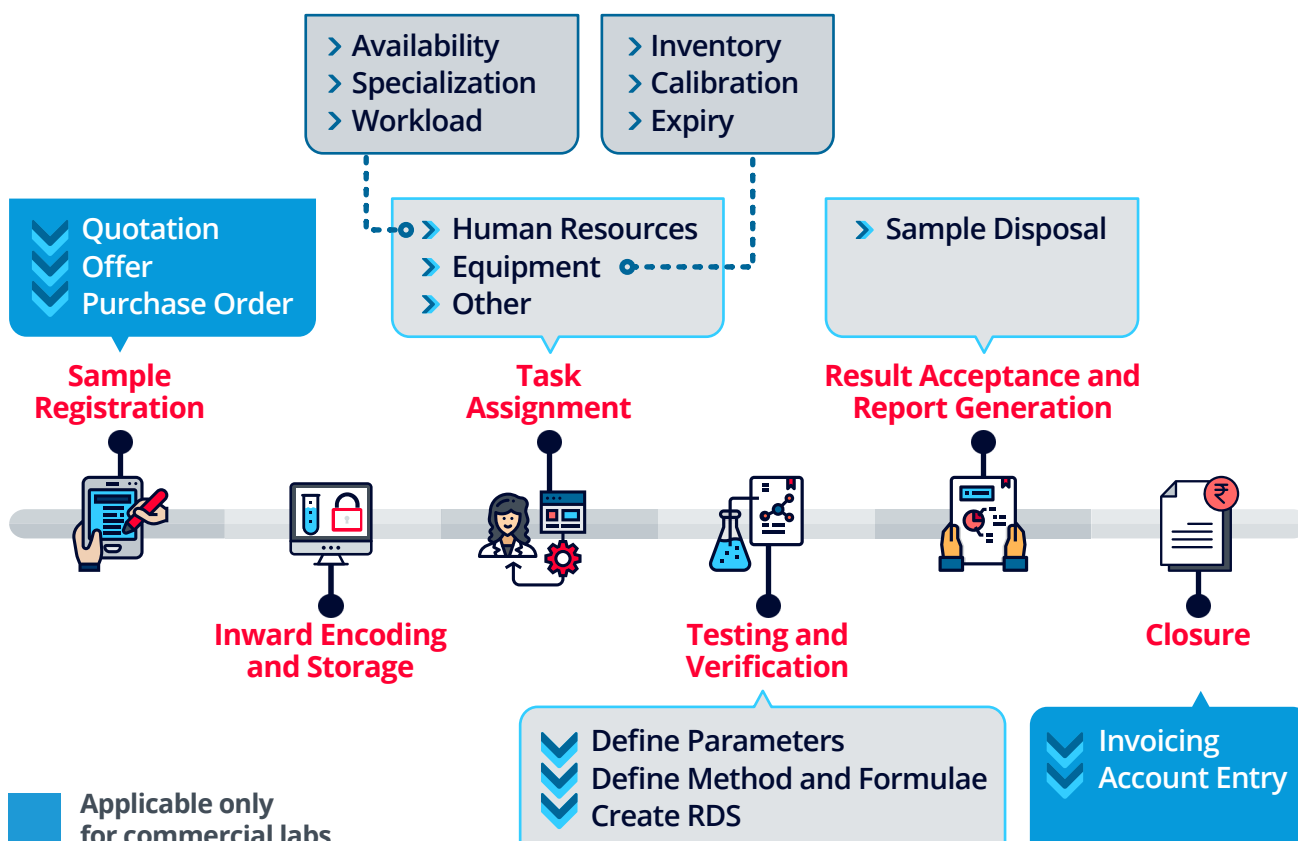

- Customer Relationship Management
- Form Builder Tool
- Inventory/Asset Management
- Workflow Management
- Project Management
- Integrated Billing and Invoicing
- Enterprise Mobility
- Intranet Portal for Industrial Units
- Customer Portal for Commercial Labs
- Human Resource Management
- Client-Systems Integration
- Instrument Interfacing

Implementation Models

Ensō-LIMS comes in three models for implementation keeping in mind client investment outlay and the degree of customization and systems integration required or expected.

- Standard edition with configurable off-the-shelf features and modules (price-based model)
- Enterprise edition with distributed location support and consulting service (price and fee-based model)
- Software as a Service (SaaS) model with standard customization options (subscription-based model)

How Ensō-LIMS Works

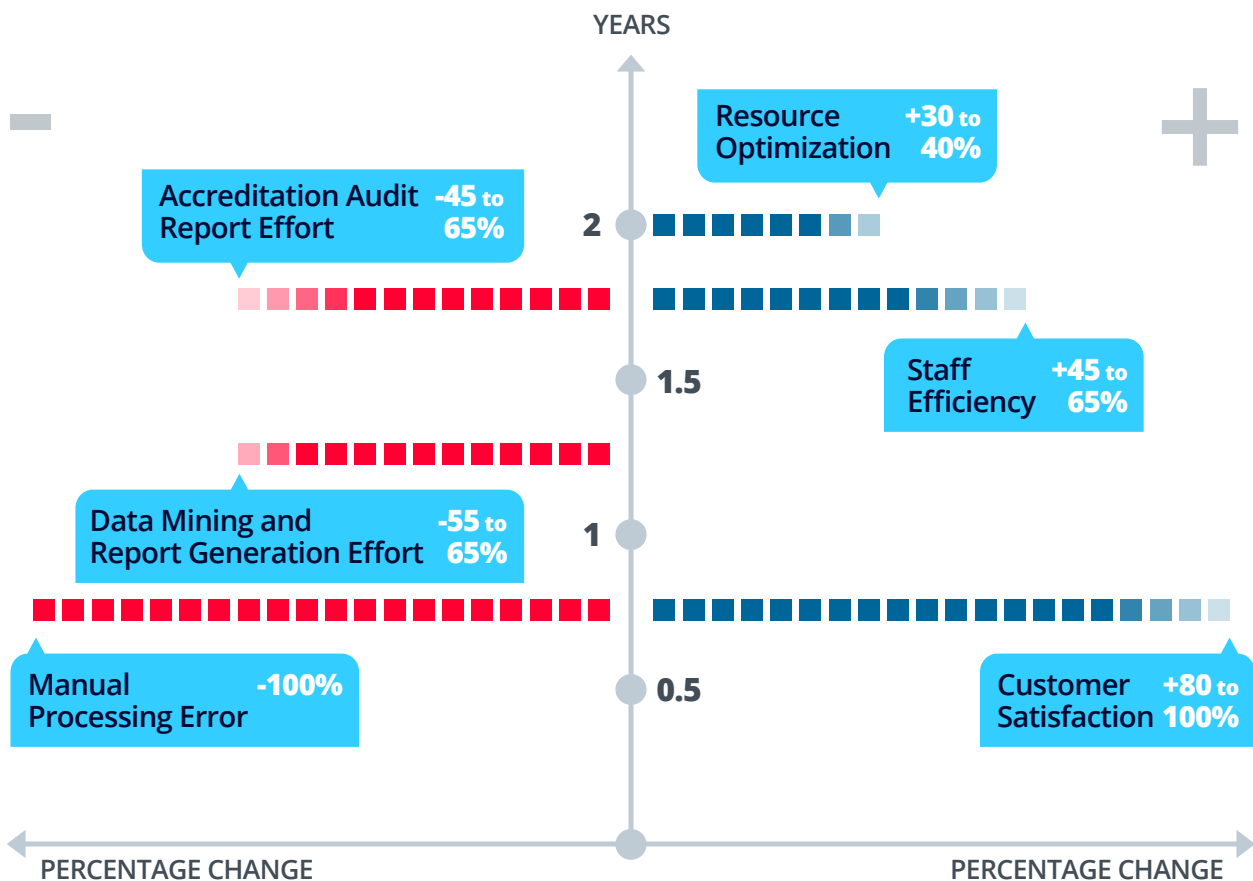

Benefits of Ensō-LIMS

Ensō-LIMS has been designed for automation of both testing and non-testing functions in a laboratory setting. Within a short period of time of a couple of years, you will not only recover your investment through gains in productivity and efficiency but optimize the execution of specific functions. The key general benefits are:

- Paperless laboratory
- Reduction of manual processing effort
- Reduction of human error
- Optimized efficiency
- Productivity gains over a span of time
- Seamless management of complex workflows
- Platform and device independent
- Flexible configuration of master lists for action
- User-friendly dashboards
- Flexible tools for form creation
- Monitoring tools for each task
- Digital integration of multiple labs
- Suitable for labs of any size and scope
- Global delivery capability
- Data centralization with work distribution
- Allows focus on core areas
- Support for regulatory compliance and audits

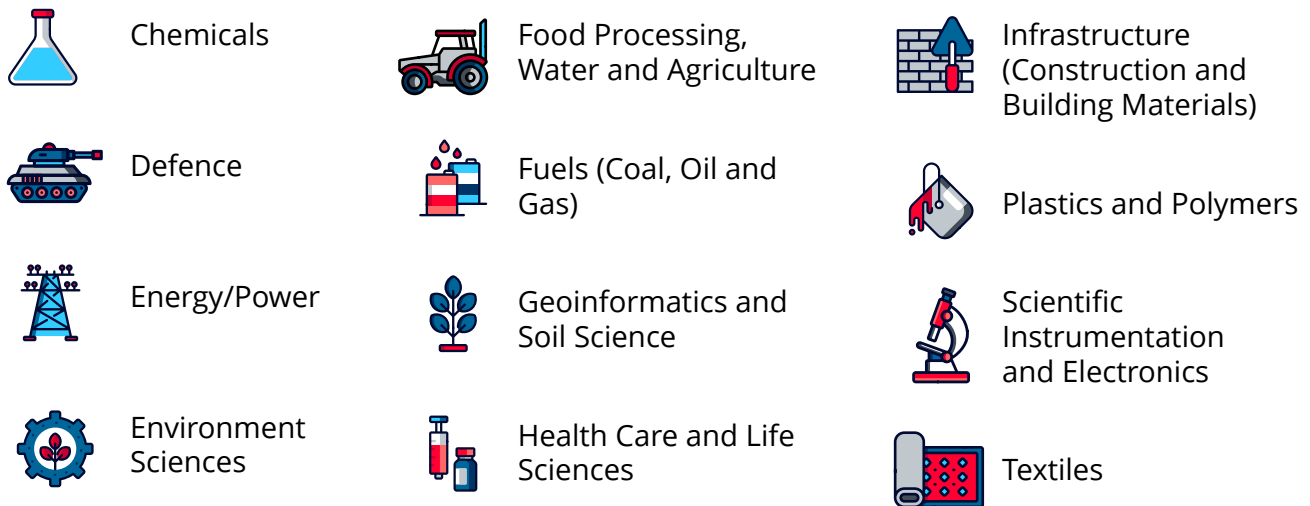

Return on Investment

Laboratories that opt for Ensō-LIMS can recover their entire investment in less than two and a half years through gains in productivity and efficiency.
